LTM Results Day: Technical Round Aur Fresher Number

16 October 2026: LTM's own fresher numbers, what students faced in the technical round on day one, and what comes next for the 2027 batch.

freshers LTM plans to onboard this year (April 2026 to March 2027). 1,308 were added by June. Today's number says how fast the rest is coming.

How to read this deck

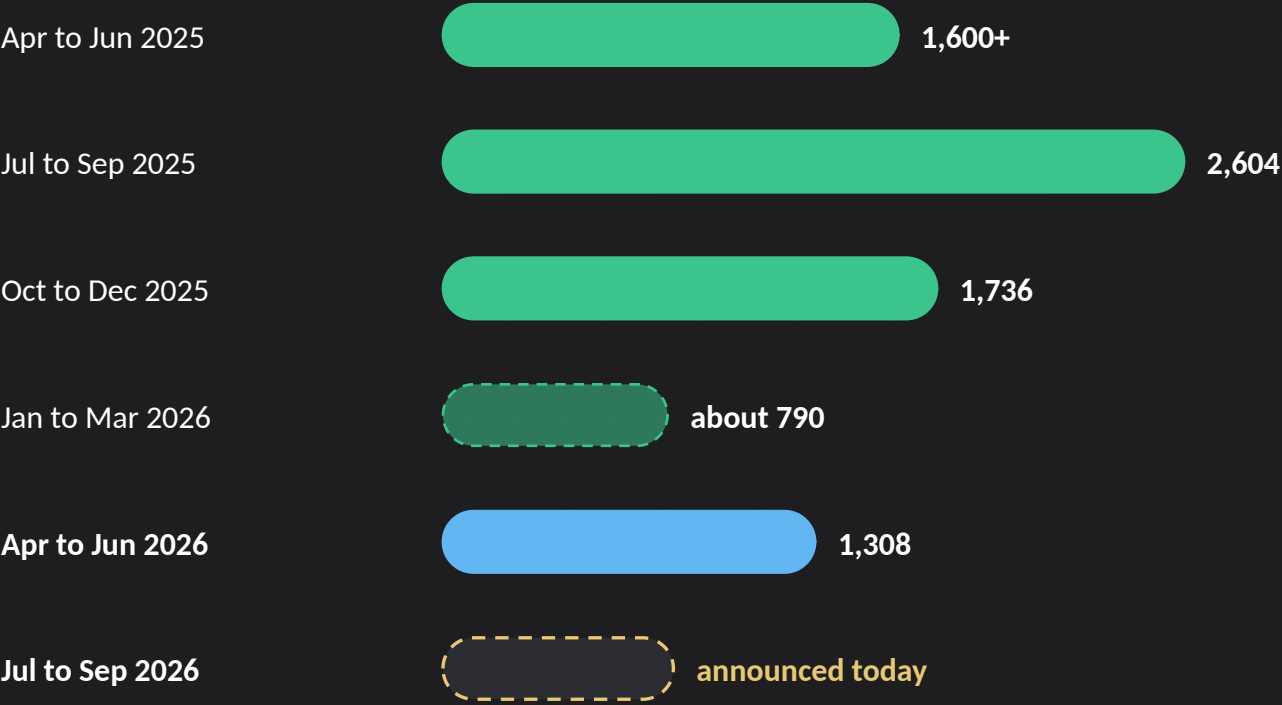

LTM SAID IT	LTM said it: its results, factsheets and calls
NEWS REPORT	A newspaper reported it, with a date
STUDENTS SAID IT	Students wrote it in public comments. Names never kept
FROM A LISTING	A listing quoting LTM's mail to colleges
NO OFFICIAL ANSWER	Many students asked, nobody official has answered
OUR BEST GUESS	Our best guess, with a how-sure meter

16 LTM videos read this week, 10 to 15 October 2026	602 comments and replies from 334 people, this week
3,641 comments in the corpus behind our first LTM video (325 videos)	5 LTM results calls, July 2025 to July 2026, plus the FY26 annual report
16 Oct results for July to September: today's number	0 other YouTube channels quoted. Only what students wrote

Could not read: LTM's own portal and mails (need a login), Instagram, Telegram. YouTube comments, LTM's investor pages and dated news only.

LTM's own fresher numbers

LTM SAID IT

6,729

freshers in FY26, "over 6,700, a 40% jump" (annual report)

more than 6,000

planned for FY27, said with the July results

87,886

total headcount at 30 June 2026; attrition 13.3%

To reach 6,000 after 1,308 in Q1: about 1,565 a quarter for the next three (our arithmetic)

Jan to Mar 2026 is worked out from the FY26 total (6,729) minus the three quarters LTM gave. Dashed means derived.

LTM results calls 17 Jul 2025, 16 Oct 2025, 19 Jan 2026, 23 Apr 2026, 11 Jul 2026; FY26 integrated annual report; Kotak Neo 13 Jul 2026 for the 6,000 plan, headcount and attrition. Q2 FY27 results: board meeting 16 Oct 2026.

Results day: the one number to watch

OUR BEST GUESS

Below 1,000

Slower than the plan needs. Expect longer waits for the 2026 batch and more "still waiting" posts. The 2027 batch offers still come, joining dates stretch.

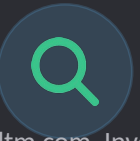

1,300 to 1,600

The pace LTM needs for 6,000. Same picture as last year: offers in December, joining in batches from May.

Well above 2,000

A catch-up quarter like Jul to Sep 2025 (2,604). Joining mails for the waiting 2026 batch should show up in the comments within weeks.

Where to read it yourself, tonight

ltm.com, Investors: the Q2 FY27 press release and factsheet carry headcount and freshers added; the results-call transcript carries the CEO's line on freshers. The number is usually in the "people" section, not the headline.

What the number does not tell you

It is a company-wide count, all roles and all campuses. It does not say how many 2027-batch offers come, or when the 2026 batch joins. Those still come from student reports. Our meter for "around 1,300 to 1,600": 3 of 5.

The three readings are ours. The 2,604 and 1,308 are LTM's numbers; the 6,000 plan is LTM's. LTM's board meets on 16 Oct 2026; the interim dividend record date, if any, is 23 Oct.

Technical round, day one

STUDENTS SAID IT

Virtual, with a link and an OTP

"In my college they said virtual interview". One student could not rejoin after a glitch because the OTP page would not open

About 30 minutes

"Mostly around 30 min". One interview ran 25 minutes before the meeting dropped

Code typed live in Notepad

Screen share, then "type a code in notepad". Full programs, not just logic

Slots from 15 Oct, 1 to 3 days after the bot

Bot on 12 Oct, technical on 15. A few with the bot on 14 had technical on 15

Some campuses later

"Bot after Dussehra, 24 October" (3 people); one bot on 23 Oct. Their technical comes after

Who moved from bot to technical

One college: 150 of 210. Another student: "the mail says non-eliminatory". Next slide

“

"I just wrapped up my technical interview today. They asked: self intro, OOPs, SQL, technical core questions (ECE), programming questions in C and Java (snippets). Told me to type a code in notepad by screensharing."

15 Oct 2026, day one of the technical round

“

"Asked 3 projects, all Java, write code on notepad... it ran till 25 minutes then suddenly a technical glitch happened, meeting ended then and there."

15 Oct 2026, 1 like. Her question: will I get another chance?

Comments under the 13 to 15 October technical-round videos, 115 people in those threads. Format details are what students experienced on 15 October; LTM publishes no interview format.

Questions asked on 15 October, grouped

STUDENTS SAID IT

Intro and resume

- Self introduction, always first
- Your projects, in depth: "asked 3 projects, all Java"
- "Mostly resume based", same as the bot

Core subjects

- OOPs concepts
- SQL queries
- DBMS basics (asked by many, reported by some)

Programming

- C and Java snippets: what does this print
- Basic arrays, strings and maths problems
- Write the full code live in Notepad

Your own branch

- ECE: technical core questions from the degree
- Mechanical and cyber security students asked what they would face: resume and OOPs, per replies

ML projects

- Accuracy, confusion matrix, F1, precision and recall
- Bias and variance, overfitting and underfitting
- Every algorithm named in the project

Nobody reported trees, graphs or dynamic programming on day one. Basic arrays and strings, your projects and OOPs carried the round. Six students posted their questions; this is their union, not a question bank.

Six students who posted what they were asked on 15 October 2026, plus channel replies on what to prepare. No question is invented; the ML list is one student's full list.

Is the bot an elimination round?

NO OFFICIAL ANSWER

LTM's mail, as one student quoted it

"According to the mail sent, it says non-eliminary round." We have not seen the mail; the student has

FROM A LISTING

A college placement cell

"From my college they have mentioned that it is one of the elimination rounds."

STUDENTS SAID IT

A college's own count

"Out of 210 members only 150 were selected from the AI bot interview to the technical interview." One student, one college

ONE STUDENT

No direct list this year?

One reply: "this time no direct shortlisting, every candidate must attend an AI bot interview". On 10 Oct students reported a direct technical list. Reports differ

REPORTS DIFFER

OUR BEST GUESS

What fits all four

The bot score goes into a list, and each college passes on its own share of that list. So the same round is "non-eliminary" in LTM's mail and "elimination" at a college desk. Last year a coordinator said the same thing: "not an elimination round, but they will calculate this score".

How sure we are

Nobody from LTM has said in public whether the bot removes anyone. Thirteen comments this week ask exactly that. If your name is missing from your college's technical list, ask the placement cell for the list source, not YouTube.

All four accounts are from the 13 to 15 October comment threads. The coordinator quote is from the 2025 cycle (our first LTM video). LTM has published nothing on the bot's weight.

Glitches, and what to do the same day

OUR TIP

Bot closed after the intro

"As soon as I completed my introduction, the test automatically closed... status showing completed" (7 likes)

Technical call dropped at 25 minutes

Could not rejoin: the OTP came but the page would not open, and the panel did not wait

Page jumped to the homepage mid-bot

One student went back in and continued; answers before the jump counted, as far as they know

Which resume do they have?

The one uploaded at registration (channel reply, asked by 3). Updating it later did not change what the panel saw

Earphones, think time

Wired earphones: asked, no answer. Think time: "4 to 5 seconds" versus "take your time, 10 questions in 35 minutes". Reports differ

No bot mail yet

"Still no mail" from several colleges on 14 and 15 Oct. Batches of mails, and some campuses only after Dussehra

OUR TIP

Same day, in this order

Screenshot the status page with the date and time

Mail your placement coordinator the same day: what happened, when, with the screenshot. Ask for a reschedule

Keep the slot mail and the link; test the link 10 minutes early

Do not re-register or re-upload unless the coordinator says so

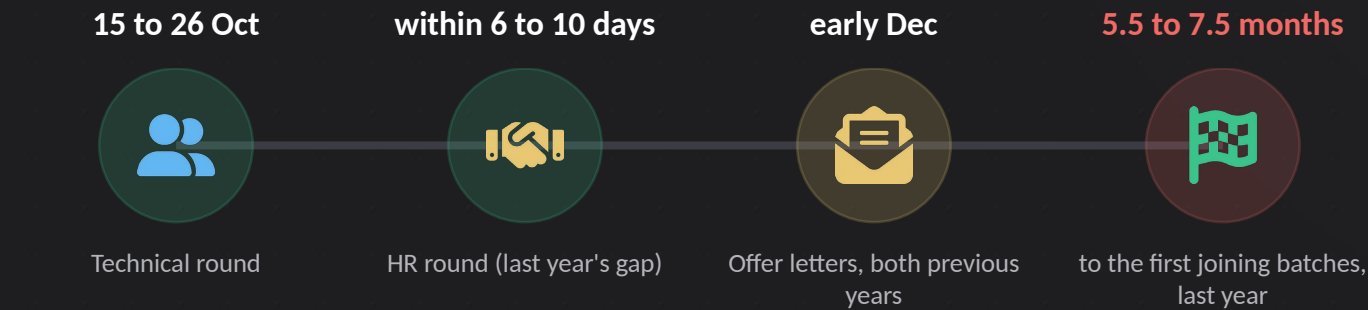

Post your dates in the group: bot date, technical date, HR date

Glitch reports from the 12 to 15 October threads. Whether a dropped session is rescheduled is not published by LTM; last year one student got a second slot after mailing the coordinator (our first LTM video).

What comes next, and the 4 LPA question

OUR BEST GUESS

“All this for a 4 LPA job”

13 Oct 2026, 29 likes: the most-liked comment under any LTM video this week

HR round within two weeks of your technical round

6 to 10 days in both previous years; some panels asked HR questions in the same call

Progress bar: 4 out of 5 segments filled (80%)

Offer letters in December

Early December in 2024 and 2025. Today's fresher number can move this either way

Progress bar: 3 out of 5 segments filled (60%)

Joining before June 2027

First batches joined 5.5 to 7.5 months after the offer; many from the 2026 batch waited 10+ months

Progress bar: 2 out of 5 segments filled (40%)

₹4,05,233

a year, Graduate Engineer Trainee, 2027 batch, from the listing quoting LTM's mail

no bond

no service agreement, per the same listing; 65% marks throughout

Our honest take: the pay is the pay, and the wait is real. Give the round your best, take the offer if it comes, and keep every other drive alive until a joining date exists on paper.

Timeline gaps from student-dated reports in the 2025 and 2026 cycles (our first LTM video). Pay from the 21 Sep 2026 listing quoting LTM's mail to colleges. Guesses and meters are ours.

Sources, every one dated

LTM SAID IT

1

LTM results calls (ltm.com): 17 Jul 2025, 16 Oct 2025, 19 Jan 2026, 23 Apr 2026, 11 Jul 2026 (freshers 1,600+, 2,604, 1,736, 1,308). FY26 integrated annual report: over 6,700 freshers, a 40% jump.

2

Kotak Neo, 13 Jul 2026: Q1 FY27, around 1,300 freshers, plan to onboard more than 6,000 in FY27, headcount 87,886, attrition 13.3%, revenue 11,608 crore.

3

5paisa and Goodreturns, 8 Oct 2026: board meeting 16 Oct 2026 for Q2 FY27 results; interim dividend record date 23 Oct if declared.

4

Tech6Sense, 21 Sep 2026: the 2027 Graduate Engineer Trainee listing quoting LTM's mail to colleges (INR 4,05,233; 65%; no bond). Business Standard, 9 Apr 2023: the 2023 precedent (600 to 700 freshers, IGNITE).

5

YouTube Data API, 16 Oct 2026: 16 LTM videos published 10 to 15 Oct 2026, 602 comments and replies from 334 people, author ids hashed at fetch time; plus the 325-video, 3,641-comment corpus behind our first LTM video (to 15 Oct). No other channel is named or quoted.

6

Not available to us: LTM's own mails and portal, Instagram, Telegram. The technical-round questions are the union of what six students posted on 15 Oct; no question bank was copied.
